

NLE is a Network Value Added Reseller that has been serving education, government, healthcare, large enterprise and other organizations for over 17 years. As partners with over 35 vendors, NLE has the relationships and skills necessary to provide its customers with the leading communication and network solutions.

## WHAT CAN **NLE** DO FOR YOU?

### Offsite Backup Solutions

- Does your library have a disaster recovery plan?
- Are you still using tapes for backup?
  - Let NLE help your library with easier, better, safer Backup Solutions

### Unified Threat Management (UTM)

- How old is your firewall?
- Hackers are attracted to use library networks – are you ready for them?
  - If your firewall doesn't support UTM layered protection, or is more than three years old, you need to upgrade to protect the library AND the community.
  - NLE has the best UTM perimeter security solutions for libraries. Does your library have a disaster recovery plan?

### Firewall and Security Reporting

- Do you have summary reports of your application and bandwidth usage?
- Have you ever completed a performance or security assessment for your network?
  - NLE can deliver your firewall reports/statistics to your desktop.
  - All libraries should know their security vulnerabilities and attacks.

### WAN Application Visibility Assessment

- Is your library considering SaaS (Software-As-A-Service) for library services?
- Is your library able to prioritize library services traffic?
- Does the library have network bandwidth usage reports by application?
  - NLE can provide performance assessments for WAN bandwidth use by application.
  - NLE has solutions for bandwidth management and application visibility.
  - Protect performance for critical library applications and services.

### WAN Optimization & Acceleration

- Is the library using consortia or centralized services over a WAN?
- Do branch libraries route back to the central library?
  - NLE has solutions to make your T1 lines feel like a 10Mbps link.
  - NLE can help libraries utilize existing bandwidth more effectively, thus deferring costly monthly charges for bandwidth upgrades.

### ILS Authenticating Wireless Network Solutions

- Can you manage your Wireless Network centrally, and authenticate via SIP2?
- Confused about Wireless Network security options or network design?
  - NLE has deployed secure and easy to manage wireless networks for hundred's of libraries.
  - NLE is a leader in using library card authentication for network services.

### Hosted Exchange Email with Spam and Virus Filtering

- Does the library need MS Exchange services without the hassle and expense?
- Is the library hosting their email server and getting too much spam?
  - NLE can deliver cost-effective hosted email services with no admin headaches.
  - NLE can lower your total costs of ownership for MS Exchange.
  - NLE has solutions to protect your existing email services too!

## Server & Work Station Health & Performance Monitoring

- Do you want to be alerted before critical hardware failures occur?
- Do you want expert advice to fix server error messages before library services are disrupted?
- Applications are now complex and integrated; do you have the tools to identify root causes of application issues?
- How old are your switches and routers; do you have a way to monitor them?
  - NLE has remote management solutions to proactively manage all servers and workstations to eliminate costly and annoying downtime.

## WHAT NLE CAN DO FOR YOU

### NLE Professional Services for Libraries:

- NLE understands the needs, issues, and challenges of library networks and IT services.
- NLE is available to assist or augment your existing IT support, or
- The Library can outsource entire IT functions to NLE.
- NLE can become the library HELP DESK, or Problem-Escalation Team to help the library manage their IT investments better with less worry.
- NLE can provide on-site support for deployment or transition projects.

### Examples of Library Projects by NLE Professional Services:

- On-site installation of network switches, routers, firewalls, workstations, software.
- Remote management of firewall policies, logs, reports, changes.
- Remote desktop hardware and software management with HELP DESK.
- WAN and application monitoring and assessment for bandwidth upgrade projects.
- Remote or on-site network and application performance analysis.
- Project Management for changing ISP connections,
- Pre-Configuration and deploying new network equipment, new servers, storage, etc.
- Setup for disaster recovery plans.
- Create new or migrate Active-Directory Domains.
